Sage Construction and Real Estate Solutions

eTakeoff

Benefits

- Boost estimating capacity and numbers confidence.
- Produce faster, more accurate estimates.
- Cut printing costs and estimate review time.
- Protect against miscommunication errors.
- Get up and running quickly through easy-to-learn software and helpful training tools.

eTakeoff®, an electronic quantity takeoff product distributed by Sage, significantly increases accuracy, productivity, and speed over traditional paper or manual takeoff methods. Powerful, versatile, yet easy to use, eTakeoff provides estimators sophisticated assembly capabilities, extensive Microsoft® Excel integration, and time-saving features like Pattern Search, an autocount symbol search feature that quickly locates and quantifies multiple occurrences of symbols within digital plans, to greatly improve the takeoff process.

Save money and your team's time.
In addition to increasing your takeoff productivity, moving from paper to digital takeoff methods eliminates the hassle and cost of producing paper copies of plans during the bid phase. As a single copy of plans can cost hundreds of dollars to reproduce, you can quickly realize substantial cost savings when producing numerous bids. And digital plans allow for easy sharing and reviewing of all takeoff projects online rather than waiting for paper to circulate among your team.

Bid with confidence
Dramatically increase both your estimating capability and your confidence in the numbers you provide. With eTakeoff, you can:

Improve productivity and speed

- Become up to 15 times more productive than when using paper or manual takeoff methods.
- Have more time to analyze estimates and take on additional bids without increasing staffing.

Improve accuracy

- Measure to within a thousandth of an inch to take any guesstimates out of your bids.
- Easily highlight what you've already taken off to avoid potential mistakes and unforeseen project costs due to omissions.

Improve communication between architects, contractors, and customers

- Provide takeoff history to automatically back up what was (and was not) included in the scope of your estimate to limit the potential for, or quickly resolve, disputes down the line.
- Easily compare new and previous drawings provided by architects to quickly see any changes that may or may not have been noted, preventing future issues that can impact a project or team relationships.

Choose the version of eTakeoff best suited to your business, or mix and match dependent on the needs of each estimator on your team. eTakeoff Advanced includes an array of built-in features so you can get started quickly with very little training. eTakeoff Premier is designed for power users to customize nearly every function and integrate those into your current estimating process.

eTakeoff Advanced features:

- Powerful measuring and scaling
- Electronic plan room integration
- Annotations
- Measurement list
- Unlimited layers
- Bid codes
- Issue management
- Extended measurement calculations
- Drawing legend
- Overlays/Revision compare
- Unlimited drawing windows

eTakeoff Premier—includes all eTakeoff Advanced features, plus:

- Advanced Excel integration
- Quantity Worksheet/Models
- Custom Extensions/Assembly capability with user-defined formulas and variables
- Advanced project and drawing management
- Advanced measuring tools
- Unlimited quantity output
- Pattern Search/Autocount

A versatile, full-featured electronic takeoff solution, eTakeoff can be used to produce quick, accurate quantity takeoffs across any construction trade.
